2. Who uses the car?
3. Why do people choose to use a car like this?

C Listen to the first part of a talk about belonging to a car club. Answer the questions in Exercise B.

Question-type tip: You have practised completing sentences or notes as you listen. Sometimes you will complete a summary of a talk or part of a talk.

2. Why is the correct answer *the weekend* and not *once a week*?
3. How does the preposition before the space help you predict the answer?
4. Which words are used in the summary that are not used in the talk? Was this a difficult space to fill?
5. How does the word *end* change in the summary?

Exam tip: There are tasks which ask you to fill spaces in notes and summaries in both the Listening and Reading Modules of the exam. These tasks test your ability to listen and read but also test your spelling and grammar.

Listening 3: practise completing a summary

A With a partner, write three questions about belonging to a car club. Then listen to the rest of the speech and check if your questions are answered.

B Read the summary below. Think about the type of word or phrase that goes into each space.

The annual (9) _____ fee is £60 and there is an hourly rate for car use. (10) _____ costs 15p a mile. You receive a monthly bill which explains all charges.

3. I understood the speaker and knew which words to write in the spaces.
4. I spelt most of my answers correctly and used capital letters when necessary.
5. I am pleased with how many questions I answered correctly.

Exam tip: If you understand what the speaker says but don't know how to make your answer fit the space, write what you hear. Always write something in a space.

Reading 1: recognizing facts and opinions

A Answer these questions with a partner.

1. Do many people travel by train in your country?
2. Is the railway system good in your country?
3. How often do you travel by train?
4. What do you like / not like about travelling by train?

B Look at the picture of a train. Check the words below and then use them to talk about the picture and predict what is in the newspaper story below.

speed motors locomotive engine carriage passengers airlines

C Read the text to check your ideas.

AGV Is the Future of Trains, *The Scientist*, 2008

A new high-speed train will soon be operating in Europe. The AGV (Automotrice Grande Vitesse) can travel at 360 km per hour. It will travel 1,000 km in just three hours. The previous highest speed for a European train was 320 km per hour.

The huge French engineering company, Alstom, has built the train. Motors are located under each carriage so there is no need for a locomotive engine to drive the train. This means the train will be able to carry more passengers.

Alstom's chief executive says that the new train is the equal of any German or Japanese train and that railway companies will now be able to compete with airlines. He compares the AGV to the world's largest passenger plane, the Airbus A380. A spokesman for Air France admits that airlines are concerned about the number of passengers who might switch to using trains for journeys within France.

An engineer who was part of the team that built the AGV says that the day the train was tested was the most exciting day of his life. He thinks that almost every engineer in the world would like to be in his shoes at the moment.

The French president says that it is great news for France. He recognizes that Alstom have invested money in research and development, and he believes the company has shown courage in developing such a futuristic train.

Exam tip: Texts often contain both facts (statements that are certainly true) and opinions (what somebody believes). You will find a text easier to read if you can recognize what is fact and what is opinion.

D Mark these ideas from the story about the AGV (F) fact or (O) opinion.

1. A new high-speed train will soon be operating in Europe. —
2. Motors are located under each carriage. —
3. The new train is the equal of any German or Japanese train. —
4. Railway companies will now be able to compete with airlines. —
5. It is great news for France. —
6. Alstom has invested money in research and development. —

Question-type tip: Sometimes you need to match a person mentioned in the text with something he or she says. Often this will be an opinion. The words and phrases in the task will not be exactly the same as those in the text.

E Mark each of the opinions below with one of the following abbreviations.

- ACE Alstom's chief executive
SAF a spokesman for Air France
E an engineer who helped to build the train
FP The French president

1. It is very brave of Alstom to build a train like this. _____
2. The AGV is like a huge aeroplane. _____
3. Other people would like to be doing what I am doing. _____
4. More people will probably want to use trains now. _____

F Highlight the lines in the text that provide the answers. Then compare with a partner.

Reading 2: practise identifying facts and opinions

A Talk with a partner. What is and where is Heathrow?

B Look at these three headings. Check any words you don't know and decide what each story could be about. Compare with a partner.

Heathrow to Grow

Everyone Wants Third Runway

Jobs Lost at Heathrow

C Now skim-read the text about Heathrow Airport on the next page and choose the correct heading. Write it in the space at the top of the text.

D Read the text more carefully and answer the questions.

For questions 1–6, mark each of the opinions below with one of the following abbreviations.

- TS transport secretary
SAG spokesman for the action group
BAAE BAA executive
STS shadow transport secretary

1. Newer planes do not make so much noise. _____
2. An expansion of Heathrow will bring money into Britain. _____
3. It would be better to get more people travelling by train. _____
4. The government will pull down buildings to expand the airport. _____
5. Heathrow will become less important if it does not grow. _____
6. Heathrow has been too busy for a long time. _____

For questions 7–10, decide if the information given below agrees with the information given in the passage. Write (T) true, (F) false or (NG) not given.

7. The transport secretary says that some people could be out of work. _____
8. The transport secretary and the spokesman for NoTRAG agree about noise levels. _____
9. The BAA executive says that Heathrow has been the busiest airport in the world for 15 years. _____
10. The spokesman for NoTRAG says that flying is not the only way to travel. _____

There has been a strong reaction to plans to expand Heathrow, already one of the biggest and busiest airports in the world. The plans mean building a third runway and a sixth terminal building, and people are very unhappy.

The government would like the third runway to be operating by 2020. The transport secretary* says that Britain depends on Heathrow as a link to the world economy. She believes that Heathrow will lose some of its reputation as a world airport if it is not expanded, and she warns that some of the 170,000 jobs at the airport could be lost.

People opposed to the expansion have set up an action group and called it NoTRAG (No Third Runway Action Group). A spokesman says that noise from planes on a new runway will affect more than fifty towns. He adds that building a sixth terminal will mean destroying around 700 homes, including one whole village. However, the transport secretary says that modern planes are becoming cleaner and less noisy and that the problem would not be so great.

The company that runs Heathrow Airport is BAA. Their chief executive says that the airport has been running at full capacity for more than 15 years and that it must expand. He believes that a third runway could be worth around £10 billion a year to the economy.

The spokesman for NoTRAG says that a third runway would mean around 900 flights more each day, and that other methods of transport should be developed instead. The shadow transport secretary** agrees. She believes that a third runway will mean more noise and pollution and feels that high-speed rail links are a much better option.

* Transport secretary – the person in the government who is responsible for transport.

** Shadow transport secretary – the person in the opposition party (the party not in power) who is responsible for transport.

Writing 1: linking words

A Look at the picture. What is the problem?
Have you ever been in this situation?

B A woman is writing to an airline to complain about a delayed flight.
Look at the notes she made before she wrote the letter.

Flight to Greece – delayed 9 hours
Flight due to leave 12.45 – left 21.45
spoke to one manager – very unhelpful
Long wait very difficult – with two small children
Very long delay – only sandwiches and one drink
arrived in Greece – too late to catch bus – take taxi –
very expensive
arrived hotel 2 a.m. – could not unpack bags
not in bed until 2.45 a.m.

Talk with a partner. How could you use the words below to link some of the notes together?

and but which when because so who although

Example: a flight to Greece which was delayed for nine hours.

C Read the letter and delete the wrong option in each pair of linking words.

I am writing about a flight to Greece (1) *which / when* was delayed for nine hours. It was Flight FK254. It was due to leave Gatwick at 12.45 p.m. (2) *but / and* finally left at 21.52.

We asked the staff at the airport why there was such a long delay, (3) *so / but* they could not tell us anything. I spoke to the senior check-in manager; (4) *who / which* was very unhelpful. He clearly did not have time to answer my questions.

Having to wait for so long was especially difficult (5) *because / so* I was with my two small children. They were very tired (6) *and / but* did not understand why there was a problem. (7) *Because / Although* it was such a long delay, your airline provided only sandwiches and one drink for each person.

(8) *When / So* we arrived in Greece, it was too late to catch the bus to our hotel (9) *but / so* we had to pay for a taxi, (10) *and / which* was very expensive. We did not arrive at our hotel until 2 a.m. (11) *When / Although* the hotel staff were very friendly, it made us feel uncomfortable. We finally got to bed at 2.45 a.m. (12) *and / but* could not unpack our bags until the next morning.

I hope you understand why I am dissatisfied with the service your airline provided. I would like you to pay for the cost of the taxi, which was 75 euros, and compensation for the delay. I look forward to hearing from you.

A

Read a web page which gives advice about how to travel around in India. Match the paragraphs A–E with the pictures 1–5.

How to get around India

India is a huge country, and there are lots of different ways to travel around. However, we should warn you that although travelling in India is exciting, it is not always easy. Airlines cancel flights and trains are delayed. Buses often do not arrive at all. You must always allow plenty of time and assume that you will arrive late!

- A.** Because India is so big, flying is often the best option. Prices have fallen recently, even to remote mountain regions and islands. Although flying is now more popular, airports cannot always deal with the amount of air traffic. Most airports have only one runway and a few boarding gates. The queues to check in are very long and move very slowly. Not all airports have air conditioning.
- B.** The railway system in India is the biggest in the world. Trains are not always on time, but the system works. Travellers can choose from a number of classes, ranging from regular to luxury. It is the best way to see the real India and to enjoy its natural beauty. Local travellers are usually happy to talk with tourists, so you will make friends, too. There are also three tourist trains which operate in the most popular parts of the country and visit the best-loved sights. They are really moving five-star hotels and, if you can afford it, travelling on one is an amazing experience.
- C.** Taking a bus is the most popular way of making a short journey, and the only cheap way to get to villages that are not on the railway system. Each area has its own bus service, which usually has a number of classes. Ordinary class buses are cheap but very crowded, and you will not usually get a seat. Express buses are more comfortable and have air conditioning, but you will be lucky if you find one with a toilet. Whatever class the bus, a journey by road can be slow and uncomfortable.

- D. You can drive in India with an international licence, but it is not an enjoyable experience. Most city streets are narrow and in a very bad condition. The highways that link cities are better, but traffic either moves very slowly or very fast. Drivers do not follow rules and there are often accidents. We advise hiring a car with a local driver. Salaries in India are low, and hiring a driver adds little to the cost of hiring the car. Hiring a driver is safer, and he will probably know something about the local area.
- E. Travelling by motorbike is popular among travellers in India. You will not experience the same delays as you will if you drive a car, and it is an exciting option. You must still be aware of how dangerous driving in India can be. We advise travellers to buy a second-hand bike rather than a new one. Small bikes with engines from 100cc to 150cc can be bought very cheaply.

Question-type tip: For some matching tasks, you must read the instructions very carefully. There may be numbers or letters that you do not need to use.
